Peek[®]

APPLICATIONS:

Peek[®] removes: Oxidation, corrosion, minor rust, tree sap, tar, wax build-up, gun powder residue, brake lining residues, finger prints, lime deposits, urine scale, graffiti, crayon and black marker, ink, grease, water marks, salt water stains, insect residue, food stains and blood stains, smoke damage and heat discoloration, . . .

Antiques and Jewellery: Peek[®] removes years of rust, residue and oxidation from gold, silver, pewter, platinum, brass, bronze, sterling and silver plate. Restores all metals to their original sheen. Removes water spots and stains from crystal, glass and enamel.

Automotive, Trucks & Cycles: Peek[®] removes heat discoloration, rust, oxidization, watermarks and tarnish from chrome, aluminium and magnesium. Polished fibreglass, Makrolon[®], glass and Perspex[®]. Also restores surfaces discoloured by tyre cleaning products and fuel. For show quality brilliance, apply Peek[®].

Aviation: Excellent on leading edges, nose cones, painted surfaces, Perspex windows and helicopter bubbles, plastics, stainless steel, and aluminium. Peek[®] protects against the elements.

Bathroom: Peek[®] removes years of residue from glass shower doors, mirrors, fibreglass shower stalls, marble, porcelain, enamel, ceramic tile, sinks and more. Restores chrome faucets, aluminium trim, brass sinks and accessories and removes urine scale from toilet bowls.

Peek[®]

APPLICATIONS:

Brass: Peek[®] instantly restores brass to its original lustre. If Peek[®] does not instantly restore your brass this indicates it is lacquered. Lacquer may be removed with acetone or paint remover then polished with Peek[®]. A tough weather-resistant shield is left after polishing.

Hotel, Restaurant & Janitorial: Peek[®] restores stainless steel sinks, countertops, water fountains, elevators and bathroom fixtures. Polishes brass railings, beer taps and wall fixtures. Buffs cloudiness from Perspex food guards; removes water stains from metals and glass. Shines cutlery, flatware, chafing dishes and silver.

Kitchen: Peek[®] cleans and leaves a highly polished lustre on stainless steel sinks, copper, brass, bronze, silverware and aluminium cookware. Removes stains, tarnish and oxidation from all metals, enamel, Formica[®], silver, flatware and serving pieces. Cleans 'baked in' marks from ceramic hobs and scale from pans and egg cookers.

Marine: Peek[®] removes tough stains from fibreglass, Perspex and glass. Eliminates tarnish, rust and oxidation from corroded aluminium, brass and stainless steel stanchions and fittings, bow rails, portholes and winches. After cleaning, Peek[®] leaves a tough weather-resistant shield to protect against saltwater corrosion. Applies maximum lustre.

Sports and Hunting Equipment: Peek[®] adds new life to trophies, golf clubs, bicycles, knives and firearms. Peek[®] is safe to use on factory gun bluing to remove powder residue. Restores fishing tackle, camping equipment and riding tack to original lustre while leaving a super-strong protective layer against the elements.

Peek[®]

APPROVALS:

NSF: (Metal cleaner and polisher for non-food contact surfaces in and around food processing areas). World's Aerospace Industry: (Boeing D6-17487; AMS 1650C; Douglas Aircraft Company). Nato: (Military operations worldwide).

INSTRUCTION FOR USE:

1. Apply Peek[®] sparingly. Do not let dry. Rub briskly on surface to be cleaned, using a dry or damp cloth. For extremely weathered surfaces or deep scratches the product should initially be rubbed in using gradually decreasing pressure and then rubbed with a damp cloth. The action can be repeated if necessary.
2. On large surface areas, Peek[®] may also be applied using a low-speed buffer (under 1000RPM).
3. On intricate surfaces, Peek[®] may be applied using an old toothbrush surrounded by a polishing cloth.
4. On minor rust or stubborn deposits, Peek[®] may be applied with a nylon scouring pad or #0000 brz/steel wool.

Caution: If in doubt, always test Peek[®] on an inconspicuous area of the item that is to be cleaned, polished and protected. Not suitable for anodised aluminium or lacquered surfaces.
